

TQA-SUP-01 - QA Portal application 054

Suppression / False Positive Request - Full Detail Export

Generated by QA Portal validation on 2026-09-05 21:30 IST

Status

Status	Draft
Scan Type	SAST
Linked Request	TQA-SAST-1394

Application

Application Name	QA Portal application 054
Department	IT - Software
Application Owner	Load Test Owner

Risk Assessment

Risk Assessment	Time-bound acceptance pending remediation review.
-----------------	---

Findings Covered

Issue ID	Severity	Description	Justification
FND-2026-001	Medium	Input validation is inconsistent on the account search endpoint. The description wraps across lines without colliding with adjacent fields.	Compensating controls are active while the permanent validation change is scheduled for the next release.
FND-2026-002	High	A security header is absent from one legacy response path.	Temporary suppression requested for seven days with an approved remediation owner and target date.
