PROFILE

An enthusiastic and energized Quality Assurance Engineer having around 5 years of experience with the aim of delivering high quality deliverables utilizing my knowledge and by continuous learning of new areas

EMPLOYMENT HISTORY

Nov 2023 — Present

Software Test Engineer, Amdocs Development LLP

Pune

Achievements/Tasks

- Created an automation framework using Playwright with Python from scratch. Designed and implemented test automation architecture. Developed reusable libraries, utilities to enhance test efficiency and maintainability.
- Performed manual testing to uncover hidden defects that automated tests cannot detect
- Developed test data and test scenarios to ensure adequate testing coverage
- Developed test plans and test cases that accurately identified and documented application defects
- Developed regression tests to ensure that new code does not introduce new defects
- Coordinated with developers, managers, and stakeholders to ensure quality of the software product

Dec 2022 — Nov 2023

Software Engineer 2, Dell Technologies

Pune

Achievements/Tasks

Automation Framework Development: Created an automation framework using Cypress from scratch. Designed and implemented scalable test automation architecture. Developed reusable libraries, utilities, and custom commands to enhance test efficiency and maintainability.

UI Automation Team Leadership: Led the UI automation team as an Automation Lead, providing guidance and mentorship. Conducted regular code reviews, ensuring adherence to coding standards and best practices. Reviewed, written test cases and test plans to ensure comprehensive coverage and effective test strategies.

CI/CD Implementation: Established CI/CD pipelines from scratch for the project, enabling automated build, test, and deployment processes. Configured and managed continuous integration tools such as Jenkins, Git.

Test-set Automation: Automated test sets to streamline the testing process and increase focus on delivering high-quality software. Identified and prioritized test cases for automation, reducing manual effort and increasing overall test coverage.

Bug Reporting, Tracking, and Retesting: Reported bugs and issues using bug tracking systems JIRA. Tracked and managed bug life cycle, collaborating with development and QA teams to ensure timely resolution. Conducted regression testing and retesting of fixed issues to ensure software stability.

Apr 2022 — Dec 2022

Security QA Engineer, Qualys

Pune

Achievements/Tasks

- Working on vulnerability management solutions.
- Read the advisory and CVEs properly, verify signature of each vulnerability
- Automating all types of Linux's signature generation based on advisory
- Release management
- Validating generated signature using Automation(Python, PERL)

Jun 2019 — Apr 2022

Automation Test Engineer, Amdocs Development LLP

Pune

Achievements/Tasks

- Automated test set so as to facilitate more focus on quality of deliverables. Bug Reporting , tracking and retesting.
- Pro actively working with the post production and pre-production team for the agile projects and ensuring smoother iterations and automate automatable test cases.
- Created multiple utility tools/application using Python on project need.
- Creating automation framework using TestNG, JUnit and Exetent reports

EDUCATION

Apr 2015 — Jun 2019	Bachelor of Technology, Techno International Batanagar	Kolkata, West Bengal
May 2013 — May 2015	Higher Secondary, Badanganj High School (HS)	Arambagh, West Bengal

SKILLS

Cypress	Microsoft Azure
Playwright	Postman
Python	AWS
Java	Selenium
Git	TestNG
SDET	Pytest
Linux	Jenkins
Docker	

LANGUAGES

English	Hindi
Bengali	

COURSES

- AZ-900: Microsoft Azure Fundamentals
- Fundamental of Python, Indian Institute of Technology Roorkee
- Python Automation and Testing, National Association of State Boards of Accountancy (NASBA)
